Challenge : *g-enabled health preparedness*

The world is facing the serious challenge from new emerging diseases such as Chicken Guinea, Bird Flu, Dengue and also the old ones such as AIDS, Malaria and many others. A strategy to prevent their emergence is the key to ensure safety. Can we use modern technologies to ensure health for all?

Objective

The conference will focus on the use of GIS and related Information and Communication Technologies in health sector for exploring the various causative factors for diseases and deliberate on better planning of health care systems.

Exhibition

Showcasing the equipments, software, services available to provide better healthcare and decision making.

Participants

Policy makers- Ministers, Geoinformatics Professionals and Scientists, Medical Professional, Geoinformatics Industry and solution Providers, Decision Makers in Public Health

Best paper awards
Best exhibitor awards

Theme

- *Health GIS Database*
- *Healthcare Planning and Management*
- *Emerging Diseases*
- *Waterborne Diseases*
- *Vector-borne Diseases*
- *Telemedicine*
- *Advances in Healthcare Instruments/Technology*
- *Information Technology for better Health Care.*

Workshops

- *Web GIS*
- *Health GIS*
- *Basic GIS*
- *Telemedicine*
- *More to be confirmed*

Activities

Key Notes, Technical Papers, Technology Shows, Session on Strategic Planning, Workshops, Exhibition

Social activities

Social events during and after conference, health and GIS quizzes, special group meetings and tours (prospective groups can contact organizer to propose their activities).

Papers in peer reviewed Journal

Papers from the conference are entitled to be considered in the special issue of International Journal of Geoinformatics
